

The 4th International Conference on Autonomic and Trusted Computing (ATC-07)

- Bring Safe, Self-x and Organic Computing Systems into Reality -

<http://www.atc-conference.org/2007/> and <http://ehpclub.stfx.ca/~atc07/>

Organized by Hong Kong Polytechnic University, China

In Cooperation with the IEEE Computer Society

Hong Kong, China, July 11-13, 2007

General Chairs

Stephen S. Yau, Arizona State University, USA
Christian Muller-Schloer, University of Hannover, Germany
Laurence T. Yang, St. Francis Xavier University, Canada

Program Chairs

Mazin Yousef, Intel, USA
Omer F. Rana, Cardiff University, UK
Bin Xiao, Hong Kong Polytechnic University, HK

Program Vice Chairs

Xiaobo Zhou, Univ. of Colorado at Colorado Springs, USA
Wolfgang Reif, University of Augsburg, Germany
Dimitris Nikolopoulos, Virginia Tech, USA
Silvia Giordano, University of Applied Science, Switzerland

Steering Committee

Jianhua Ma (Chair), Hosei University, Japan
Laurence T. Yang (Chair), St. Francis Xavier Univ., Canada
Hai Jin, Huazhong University of Sci. & Tech., China
Jeffrey J.P. Tsai, University of Illinois at Chicago, USA
Theo Ungerer, University of Augsburg, Germany

International Advisory Committee

Jiannong Cao, Hong Kong Polytechnic University, HK
Chin-Chen Chang, Feng Chia University, Taiwan
Jingde Cheng, Saitama University, Japan
Zhong Chen, Peking University, China
Petre Dini, Cisco Systems, USA
Tadashi Dohi, Hiroshima University, Japan
Salim Hariri, University of Arizona, USA
Jadwiga Indulska, University of Queensland, Australia
Janusz Kacprzyk, Polish Academy of Sciences, Poland
Sy-Yen Kuo, National Taiwan University, Taiwan
David Ogle, IBM, USA
Manish Parashar, Rutgers University, USA
Franz J. Rammig, University of Paderborn, Germany
Kouichi Sakurai, Kyushu University, Japan
A Min Tjoa, Vienna University of Technology, Austria
Kishor S. Trivedi, Duke University, USA
Xinmei Wang, Xidian University, China

Publicity Chairs

Willy Susilo, University of Wollongong, Australia
Xinwen Fu, Dakota State University, USA
Xiaoyuan Gu, Technical Univ. of Braunschweig, Germany
Deqing Zou, Huazhong University of Sci. & Tech., China
Norita Foulkia, Otago University of Otago, New Zealand

International Liaison Chairs

Benno Overeinder, Vrije University, The Netherlands
Jean-Marc Seigneur, University of Geneva, Switzerland
Yuanshun Dai, Indiana University-Purdue University, USA
Noritaki Yoshikai, Nihon University, Japan

Publication Chairs

Tony Li Xu, St. Francis Xavier University, Canada
Xiaolin (Andy) Li, Oklahoma State University, USA

Award Chairs

Yi Mu, University of Wollongong, Australia
Roy Sterritt, University of Ulster at Jordanstown, UK
Chunming Rong, University of Stavanger, Norway

Panel Chairs

Huaglori Tianfield, Glasgow Caledonian University, UK
Zhen Liu, IBM Research Center, USA

Financial Chair

Lin Chen, Hong Kong Polytechnic University, HK

Web Administration Chair

Tony Li Xu, St. Francis Xavier University, Canada

Local Arrangement Chairs

Zhijun Wang, Hong Kong Polytechnic University, HK
Zili Shao, Hong Kong Polytechnic University, HK
Kang Ying Allan Wong, Hong Kong Polytechnic Univ., HK

Program Committee

See ATC-07 web site: www.atc-conference.org/2007/

Further questions, please contact with

ATC07 Secretariat <atc07@googlegroups.com>

Computing systems including hardware, software, communication and networks are growing towards an ever increasing scale and heterogeneity, becoming overly complex. Such complexity is getting even more critical with the ubiquitous permeation of embedded devices and other pervasive systems. To cope with the growing and ubiquitous complexity, Autonomic Computing (AC) focuses on self-manageable computing and communication systems that exhibit self-awareness, self-configuration, self-optimization, self-healing, self-protection and other self-x operations to the maximum extent possible without human intervention or guidance. Organic Computing (OC) additionally emphasizes natural-analogue concepts like self-organization and controlled emergence.

Any autonomic or organic system must be trustworthy to avoid the risk of losing control and retain confidence that the system will not fail. Trust and/or distrust relationships in the Internet and in pervasive infrastructures are key factors to enable dynamic interaction and cooperation of various users, systems and services. Trusted/Trustworthy Computing (TC) aims at making computing and communication systems as well as services available, predictable, traceable, controllable, assessable, sustainable, dependable, persist-able, security/privacy protect-able, etc.

A series of grand challenges exist to achieve practical self-manageable autonomic systems with truly trustworthy services. ATC-07 addresses the most innovative research and development in these challenging areas and includes all technical aspects related to autonomic/organic computing (AC/OC) and trusted computing (TC). ATC-07 is a successor of the First Int'l Workshop on Trusted and Autonomic Ubiquitous and Embedded Systems (TAUES-05, Japan, Dec.), the Int'l Workshop on Trusted and Autonomic Computing Systems (TACS-06, Austria, Apr.), and the 3rd International Conference on Autonomic and Trusted Computing (ATC-06, Three Gorges, China, Sep.).

Topics include but are not limited to the following:

- AC/OC Theory and Models

Nervous/organic models, negotiation, cooperation, competition, self-organization, emergence, etc.

- AC/OC Architectures and Systems

Autonomic elements & their relationship, frameworks, middleware, observer/controller architectures, etc.

- AC/OC Components and Modules

Memory, storage, database, device, server, proxy, software, OS, I/O, etc.

- AC/OC Communication and Services

Networks, self-organized net, web service, grid, P2P, semantics, agent, transaction, etc.

- AC/OC Tools and Interfaces

Tools/interfaces for AC/OC system development, test, monitoring, assessment, supervision, etc.

- Trust Models and Specifications

Models and semantics of trust, distrust, mistrust, over-trust, cheat, risk, reputation, reliability, etc.

- Trust-related Security and Privacy

Trust-related secure architecture, framework, policy, intrusion detection/awareness, protocols, etc.

- Trusted Reliable and Dependable Systems

Fault-tolerant systems, hardware redundancy, robustness, survivable systems, failure recovery, etc.

- Trustworthy Services and Applications

Trustworthy Internet/web/grid/P2P e-services, secured mobile services, novel applications, etc.

- Trust Standards and Non-Technical Issues

Trust standards and issues related to personality, ethics, sociology, culture, psychology, economy, etc.

IMPORTANT DATES

Submission Deadline:	January 15, 2007
Authors Notification:	March 15, 2007
Final Manuscript Due:	April 15, 2007

ELECTRONIC SUBMISSION

Prepare your paper with free styles not more than 15 pages in PDF file. Submit your paper(s) at the ATC-07 submission site: <http://ehpclub.stfx.ca/~atc07/sub/>

PAPER PUBLICATION

Accepted papers will be published by Lecture Note in Computer Science (LNCS), final approval pending. Authors of accepted papers, or at least one of them, are requested to register and present their work at the conference, otherwise their papers will be removed from the digital library after the conference.

Distinguished papers, after further revisions, will be published in special issues of the Journal of Autonomic and Trusted Computing (JoATC), and the International Journal of High Performance Computing and Networking (IJHPCN). A set of high quality papers of the conference, after further revisions, also will be published in an edited book published by Springer, Germany.
